LIVEBAND[®] Precision Meets Portability

Blood Flow Restriction System

LiveBand BFR serves a diverse range of clients undergoing post-surgery rehabilitation or athletes seeking to mitigate injury. Older and immobile clients benefit too through muscle preservation, improved mobility and balance. For clients on the road to recovery and enhanced quality of life, LiveBand BFR advances the rehabilitation process by using a low-load approach to minimize the stress on healing tissues.

Value-Driven Excellence:

LiveBand BFR is affordably priced, making advanced BFR technology accessible to practitioners of all sizes and budgets.

Automatic Measurement of Limb Occlusion Pressure

Sensors precisely measure and establish individualized Limb Occlusion Pressure for each patient.

Precision with Active Pressure Management

Gain clinical confidence and say goodbye to concerns about fluctuations - LiveBand BFR ensures consistent limb occlusion pressure, regardless of limb position or exercise type.

Rep Counter

Rep counter guides patients through workouts ensuring that patients stay motivated and on track with their session.

LED Halo Indicator

Our unique and intuitive LED Halo Indicator goes beyond a simple numerical display and provides real-time, visual feedback on session progress.

Portability Redefined

Our portable design allows for flexibility in treatment settings, empowering you to provide exceptional care wherever your patients need it without compromising on quality.
