

CRYO PRO[™] XL

COLD COMPRESSION THERAPY

COLD COMPRESSION THERAPY

Cold compression therapy works by constricting the blood vessels, which in turn reduces swelling and inflammation. The Cryo Pro™ XL control units features automated compression and easy set-up for patient comfort.

In addition, cold compression can help reduce a patient's dependence on painkillers following injury.

- Provides pain relief
- Reduces swelling and inflammation
- Prevents or limits bruising
- Slows or stops bleeding

'encourage quick and effective healing for a variety of injuries'

PORTABLE DESIGN

The Cryo Pro™ XL are designed for ultimate convenience and portability, making it easy to use them anywhere. Each unit features a well-balanced handle for stability when filled with water and ice, while a portable power bank allows for pulse compression therapy anytime, anywhere.

The Cryo Pro™ XL Portable Bag comfortably holds the unit and wraps with an adjustable strap, offering extra storage for accessories like the drain gadget, power bank, hose or dual hose, and additional wraps.

TECHNICAL INFORMATION

- Intermittent cold water flow recovery device
- 6L Reservoir to be filled with water and ice

COLD COMPRESSION THERAPY

SIMPLE TO USE

The Cryo Pro™ XL is a simple-to-use product, requiring only ice, water, and power (mains or battery). The wraps are simple and easy to apply – one size fits all with the hook and loop fixing allowing the wraps to be adjusted to fit each patient correctly.

The Cryo Pro™ XL unit has a straightforward digital display with 9 settings to control session time and compression level. It is simple to empty and clean, removing the water from the main unit is easy due to the removable lid. The wraps are easy to drain, using the draining gadget.

WRAPS

The Cryo Pro™ XL enables you to target specific areas of pain or swelling with our full range of wraps. These include 360 Knee, Shoulder, Ankle, Universal, Full Leg, Full Long Leg and our newest wrap the Back and Hip wrap.

Back and Hip Wrap

Can be applied and worn similar to a belt over the affected areas.

Extension strap

To be used to allow for more room and space when wearing a wrap for maximum comfort during recovery.

Dual Hoses

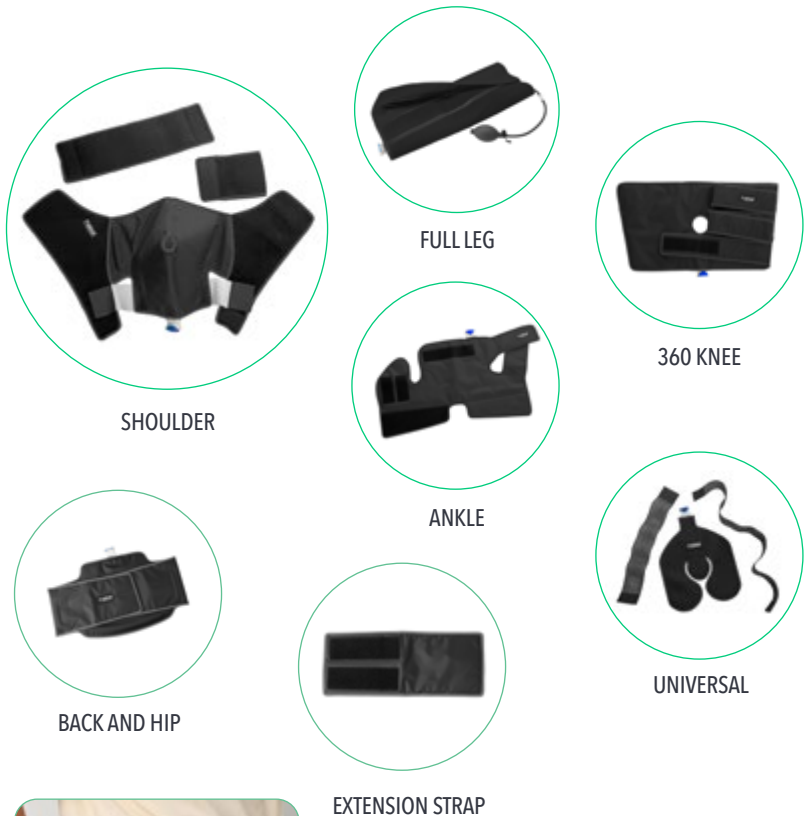

To be used with the Cryo Pro™ XL to allow for two wraps to be used simultaneously.

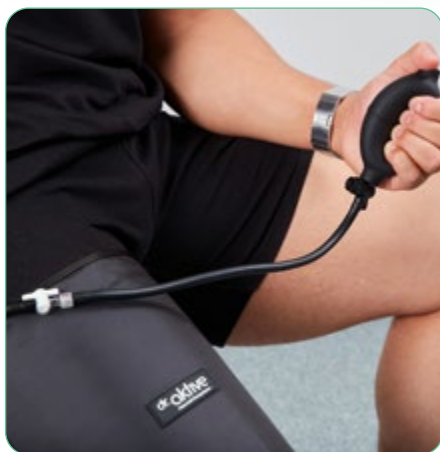

Full Leg Wrap

The Full Leg Wrap provides cold compression to the whole leg. Full Leg Wrap Length: 25 Inches (63.5cm)

Full Long Leg Wrap

The Cryo Pro™ XL Full Long Leg Wrap provides cold compression therapy to the whole leg. It is slightly longer than the Full Leg. Full Long Leg Length: 32.3 inches (82cm)
