

When portability
is the priority

Patients are leaving the hospital sooner

and DVT risk can last for 30 plus days post discharge. EmphaSource introduces VenaPro, a truly portable device to help prevent post-operative DVT for moderate to high risk patients.

VenaPro is designed for optimal patient comfort and compliance.

- *No tubes or cords*
- *One button operation*
- *Weights less than one pound*
- *Designed based on clinically proven technology*
- *Graduated and asymmetric compression*
- *Air releases to cool patients' legs*
- *Re-chargeable battery (8 hour battery life)*
- *Applies 50mmhg once per minute*
- *Patients don't need to return the device!*

Indications

- Aid in the prevention of DVT
- Can also be used as an aid in the prophylaxis for DVT by persons expecting to be stationary for long periods of time
- Enhance blood circulation
- Diminish post-operative pain and swelling
- Reduce wound healing time
- Aid in the treatment and healing of: stasis dermatitis, venous stasis ulcers, arterial and diabetic leg ulcers, chronic venous insufficiency and reduction of edema in the lower limbs
