

# Pain Relief, *Redefined* Without Wires.

Safe · Non-Invasive · Extended Duration · Self-Contained

**80 mA·min**  
Max Dosage

**14 Hours**  
Treatment Duration

**6 Kits**  
Per Box

**Zero**  
External Power

The FabStim Iontophoresis Patch delivers controlled electric currents directly to the treatment site — providing rapid, extended pain relief without cables, plugs, or external batteries. A truly patient-centered solution built for clinical efficiency.

## KEY FEATURES

- No External Power Required**  
Fully self-contained — no batteries, cords, or machines needed.
- Breathable & Flexible**  
Soft material conforms to the body — comfortable for all-day extended wear.
- Targeted Ion Delivery**  
Precisely drives medication to the site of pain — quickly and effectively.
- Simple Clinical Setup**  
Fast application, improved compliance, and no special equipment.

## HOW IT WORKS

- 1 Prepare the Site**  
Identify the treatment area and hydrate the patch with the included saline vial.
- 2 Apply the Patch**  
Place directly over the affected area — no wires, no setup, activates on contact.
- 3 Deliver Treatment**  
Up to 80 mA·min of controlled current delivered over a 14-hour period.

## WHAT'S IN THE BOX

- ✓ 6 Iontophoresis Patches
- ✓ 6 Saline Vials
- ✓ 80 mA·min per patch
- ✓ 14-hr delivery window
