

TheraFace Depuffing Wand

Ultra-Portable Cold & Heat Facial Treatment Clinically Tested

The TheraFace Depuffing Wand is a skincare device with science-backed cold and heat treatments to help you depuff and glow anytime, anywhere. The refreshing cold treatment instantly helps decrease puffiness, minimize dark circles, revitalize tired-looking eyes and reduce the appearance of pores. The rejuvenating heat treatment boosts lymphatic drainage, helps improve product absorption and enhances radiance. Designed with a contoured, easy-glide applicator tip to reach every inch of your face, even the curves and corners around the eyes and nose. Our proprietary Cryothermal Technology™, allows the wand to reach each desired temperature in seconds and stays constant for your entire treatment**.

*Clinical studies showed decreased puffiness and dark circles under the eyes, and enhanced radiance.

**Exact temperatures may vary depending on environmental factors and consecutive treatment sessions.

Clinically-proven benefits

- Increase Firmness
- Improve Elasticity
