

**DPE Medical** Presents:

# Sense of Balance

The Sense of Balance is an advanced, all-in-one solution for improving patients' balance, posture, and mobility through fun, interactive, and data-driven therapy sessions.

Battery powered

Portable

Easy to use

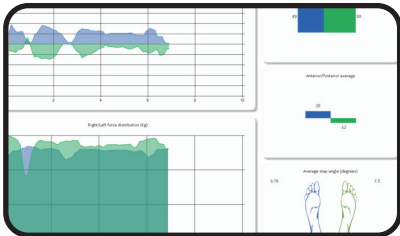

## Portable & Battery-Powered

The lightweight design includes a foldable pressure mat, a 14-inch tablet, and wheels for effortless transport. Use it anywhere—on battery power if needed—making it ideal for clinics of all sizes.

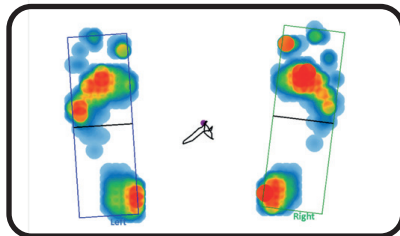

## Pressure Mapping

Track critical balance metrics like right/left and anterior/posterior pressure distribution, feet angle, and center of pressure (CoP) in real-time, providing essential insights for personalized treatments.

## Romberg Test

Conduct the internationally recognized Romberg Test to assess balance with both the classic and extended versions, ensuring thorough evaluations of postural stability.

## Engaging Therapy Games

Three interactive games controlled by the patient's center of pressure help improve balance, weight shifting, and cognitive skills. Patients stay motivated and engaged as they progress through fun challenges!
