

Push[®] med Elbow Brace Epi

Relieves tennis and golfer's elbow

Delivers Localized Pressure via Skin-compatible Viscoelastic Polymer Pad

- Comfortable localized pressure to extensor or flexor origin
- Does not shift on the arm, especially during active play
- Directs pressure to polymer pad through C-shaped reinforcement (does not strangle blood flow)
- Can be machine washed on gentle cycle at low temperature
- Creates soft, comfortable feel and wicks moisture through Sympress[™] microfibers

Indications

Medial or lateral epicondylitis (tennis or golfer's elbow)

Measuring / Sizing

One size / adjustable ((7 ¾ - 13 ¾" / 20-35cm circumference)

Insurance Information

- The innovative characteristics for some of the Push braces do not fit current L-code identifier categories; therefore, there is no L-code identifier for the Push med Elbow Brace Epi.
- BraceLab is not a provider. We do not file insurance nor can we provide information on insurance coverage or reimbursement rates. Please contact your insurance for filing information.

"I am an Occupational Therapist and a Certified Hand Therapist.... As someone who was treated literally thousands of these injuries, [the Elbow Brace Epi] is by far the best product to treat medial and lateral epicondylitis conservatively. **"**
