

Push Sports Ankle Brace Kicx

Easy-on Brace, Based on Professional Taping

The Push Sports Ankle Brace Kicx stabilizes the ankle with the groundbreaking Prophy-X strap system that replicates professional athletic taping techniques. This easy-to-apply brace can be worn inside any shoe, including cleats, and is designed to optimize foot function for all types of athletes. The lightweight, ultra-thin, yet strong materials allow for unrestricted performance, while adjustable compression assures maximum comfort. The brace is easily applied with a straightforward strap system, and high-quality materials allow for breathability and durability.

Indications

- Lateral/medial ankle sprain
- Chronic ankle instability
- Ankle sprain prevention

Worn with Cleats, Designed for Athletes

The two most common reasons soccer players do not wear an ankle brace is because it cannot fit comfortably in their cleat and they lose the foot mobility required for adequate ball control. Push Sports Braces designed the Push Sports Ankle Kicx to solve these issues. The Prophy-X strap system prevents the ankle from rolling but does not inhibit foot mobility while the use of ultra-thin, lightweight materials allows the brace to fit into any type of cleat or athletic shoe. This combination provides an athlete with the perfect combination of protection and control.

Ordering Push® Braces

- Order via website or phone with credit card
- Ask about our volume discounts or how to establish purchase order/billing account

To help your patients order directly:

- Print them a copy of the **Patient Information Sheet** from the relevant product webpage
- Help them determine the correct size
- Let them know they must file their own insurance; BraceLab is unable to assist
