

# Wall Bracket Anchor Systems

The Med Sled® Wall Bracket Anchor System ensures a dedicated anchor point for the carabiner braking system when difficult handrail locations exist.

Additional wall anchor points available to simplify the process of the stairwell descent.

**#MSWB3** Med Sled® Wall Bracket  
7 1/2" W x 4" H x 2 3/8" D

**Hollow Block** or **Grout-filled Block** Anchor System wall installation (may also be used for solid Concrete wall applications)

- \* Specialized anchors included
- \* Complete mounting instructions included

**Specify Wall Type when ordering**

26 1/4" W x 4" H x 2 3/8" D

**Hollow Wall** Anchor System for Metal Stud, Wood Stud, and Plaster installation

- \* Specialized anchors included
- \* Complete mounting instructions included

## KEY BENEFITS

- + Defines precise attachment point for the Med Sled's carabiner
- + Terrific alternative for weak or non-commercial handrails
- + Eliminates slack in braking tether providing constant tension
- + Increases load capacity
- + Increases functionality of sled performance during vertical sled deployment
