

- Game Ready® with active compression delivers cold therapy that works faster, penetrates deeper and lasts longer than other treatment modalities
- the cold compression wraps incorporate an active temperature exchange unit that maintains cool temperature and a pneumatic compression
- the system has a control unit and full range of ergonomic wraps for all body parts

control unit		
13-2500	GRPro 2.1 control unit includes AC adapter and 6 ft connector hose	2,830.00

wraps		additional sleeves		
upper extremity		upper extremity

*does not include heat exchanger

PresSsion® sequential / gradients sequential compression therapy

4 chamber sequential 651-4

- intermittent gradient sequential
- 180 second air eject after shut off
- inflation (15 sec/chamber), deflation (12 sec/cycle), timer (30-180 min), pressure (20-80 mmHG)

pump only

00-4307	4 chamber	750.00
---------	-----------	--------

4 chamber sequential / gradient sleeves

arm		length	
04-3207	medium	17"	340.00
04-3208	large	29"	340.00

8 chamber gradient sequential 652-8

- gradient or pressure modes
- continuous operation with intermittent loading
- uncorking and focus modes
- 60 second air eject after shut off
- inflation (25-30 sec/chamber), deflation (12 sec/cycle), timer (15-180 min), pressure (20-129 mmHG)

pump only

00-4309	8 chamber	1,140.00
